

How do I safely and effectively use/ignite an Orion SOLAS handheld or floating smoke flare?

Before buying, using, or storing any Orion signals, make certain all cautions, warnings, and use instructions are read, understood, and followed.

Orion SOLAS Handheld Flare (Item #813, 814, and 826):

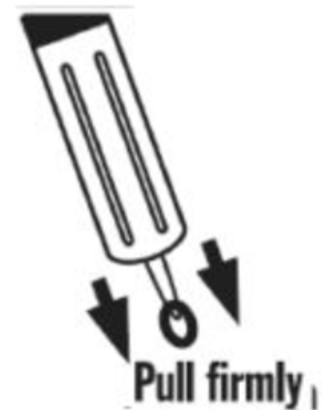

1. Pull both ends of the flare in opposite directions until engaged.

2.

Hold signal with arrow pointed upwards. Remove red cap at bottom, releasing pull string and ring.

3.

Hold flare over head and away from face and body. When a rescue vessel is spotted, pull ring straight down.

4.

With back to wind, continue to hold flare overhead and away from body. Do not wave flare.
